# From the Chairman's Desk

Dear Colleagues,

It is my greatest pleasure to bring to you the **Annual Neurocritical Care Update 2017!**

As the Organizing Chairman, I could not think of a better time than to coincide the event with the most spectacular, the most vibrant and most colourful of all seasons. Spring is a miraculous experience in India. After the cold and dead winter, it is the season for rejuvenation. A season to renew the excitement and zest for life, and make a new beginning.

Friends, a lot of thought and effort has gone into deciding and designing the content of the conference. We have modified our program to give you ample platform to hone in on your skills and interact with the masters on the issues you've always been doubtful about. We have shifted the main focus from the dreary and didactic lectures, to sessions where we interact...question...debate... and demonstrate in order to innovate and thus, evolve ourselves. This paradigm shift in our outlook has drawn attention, appreciation and support of many stalwarts in the field of Neurocritical Care, both in the country and abroad. I can attest that our design will not only meet your expectations, rather it would be an enriching experience for you. Not only will you find the nuances refreshing, but also worth remembering in times to come!!

We have invited renowned national and international faculties to enrich us with their knowledge and expertise.

Program also include first of its kind workshop on TCD and Dr Vijay Sharma is coming all the way from Singapore to conduct and moderate it.

My team here is eagerly looking forward to see you at the conference. So block your calendar for the power-packed two days of the conference and help us transform our baby steps to giant strides!!!
